Professional Summary

Computer Engineering student (7th semester) with hands-on experience in full-stack mobile and web development, technical documentation, and team leadership. Built cross-platform mobile applications (Flutter/Firebase) and REST APIs (Node.js/Express), applying DSA and OOP across multiple coursework projects. Proficient in C, C++, Dart, JavaScript, and Python with a solid foundation in MVC, UML/DFD, automata theory, digital logic, and VHDL. Elected Class Representative for three consecutive semesters, demonstrating consistent peer trust and organisational reliability.

Education

Sagarmatha Engineering College (SEC)

Bachelor of Engineering in Computer Engineering (BCT)

Expected Mid-2027

Morning Glory Secondary School, Kanchanpur

+2 Science, Higher Secondary Education

2020–2022

Modern Montessori Bal Vidyalaya, Kanchanpur

Secondary Education (SEE)

2020

Technical Skills

Programming Languages: C, C++, Dart, Python (basic), JavaScript

Mobile Development: Flutter, Dart, Firebase (Auth, Firestore, FCM), Android Studio

Backend & APIs: Node.js, Express.js, JWT Auth, REST APIs

Frontend: HTML5, CSS3, JavaScript (ES6+), Next.js (basic)

CS Fundamentals: OOP, MVC, DSA, UML/DFD, Automata Theory, Formal Grammars, Digital Logic, K-map, VHDL

Tools & Platforms: Git, GitHub, VS Code, Overleaf (LaTeX), DataCamp

Soft Skills: Team Leadership, Technical Documentation, Cross-functional Collaboration, Public Speaking

Languages: Nepali (Native), English (Professional), Hindi, Doteli

Experience

Sagarmatha Engineering College · BCT Department

Class Representative (CR)

5th Sem – Present (3 Semesters)

- Elected and re-confirmed as Class Representative for the 5th, 6th, and 7th semesters.
- Acted as the primary liaison between students and faculty, coordinating academic and administrative matters.

Modern Montessori Bal Vidyalaya, Kanchanpur

Student Body President

2019–2020

- Elected school president for Grade 10; coordinated school events and represented student interests to administration.
- Founded and structured student-led initiatives, fostering a collaborative school environment.

Projects

Cloud-Based Medication Adherence Monitoring Application *Flutter, Dart, Firebase, Node.js, Express.js, JWT Auth | 2024*

- Developed a cross-platform mobile app (Android/iOS) as a minor project with a team of four, featuring real-time Firestore data sync and role-based access for Supervisor, Doctor, Nurse, and Patient.
- Built a JWT-secured Node.js/Express REST API backend with a node-cron scheduler for automated dose reminders and Firebase Cloud Messaging (FCM) for push notifications.
- Integrated a chatbot powered by Groq API for clinical term explanations accessible to patients.
- Produced full technical documentation including UML/DFD diagrams and a LaTeX report on Overleaf.

Snake Game

C++, graphics.h | 2023

- Led team in building a graphical Snake game implementing game loop, collision detection, score tracking, and boundary logic using the `graphics.h` library.
- Conducted the overall project presentation to faculty as Team Leader for the Computer Graphics course.

Task Scheduler Application

C++ | 2023

- Built a scheduling system using priority queues and linked lists to manage and resolve conflicts between scheduled events as part of a DSA coursework project.

Quiz Application

C++ | 2022

- Designed a console-based quiz application applying core OOP principles — encapsulation, inheritance, and polymorphism.
