Professional Summary

Computer Engineering student (7th semester) with hands-on experience in software development, web interfaces, and computer vision systems. Proficient in Python, C++, Dart, JavaScript, HTML5, and CSS3, with working knowledge of React.js and UI design in Figma. Built cross-platform mobile apps (Flutter/Firebase), IoT/CV assistive devices (YOLOv8/ESP32), and REST APIs with AI integrations (Groq API, Prompt Engineering). Completed DataCamp certifications in Python, SQL, and AI, alongside college ML training; elected Class Representative for 3 consecutive semesters with strong leadership skills.

Education

Sagarmatha Engineering College (SEC)
Bachelor of Engineering in Computer Engineering (BCT) *Expected Mid-2027*

Morning Glory Secondary School, Kanchanpur
+2 Science, Higher Secondary Education *2020 – 2022*

Modern Montessory Bal Vidyalaya, Kanchanpur
Secondary Education (SEE) *2020*

Technical Skills

Programming Languages: Python, JavaScript, C, C++, Dart

Web & Frontend: HTML5, CSS3, JavaScript, React.js, Responsive Layouts, Figma

AI, CV & ML: YOLOv8 Nano, OpenCV, PyTorch, Neural Networks, Scikit-learn, NumPy, Pandas, Prompt Engineering

Backend & Mobile: Node.js, Express.js, REST APIs, JWT Auth, Flutter, Firebase (Auth, Firestore, FCM), SQL

Tools & Hardware: ESP32, Serial Comms, Git, GitHub, VS Code, Overleaf (LaTeX), CustomTkinter, DataCamp

CS Fundamentals: OOP, Data Structures & Algorithms (DSA), MVC, UML/DFD, Automata Theory, Digital Logic

Soft Skills: Team Leadership, Technical Documentation, Cross-functional Collaboration, Public Speaking

Languages: Nepali (Native), English (Professional), Hindi, Doteli

Experience

Sagarmatha Engineering College · BCT Department *5th Sem – Present (3 Semesters)*
Class Representative (CR)

- Elected and re-confirmed as Class Representative for the 5th, 6th, and 7th semesters.
- Acted as the primary liaison between students and faculty, coordinating academic matters and departmental events.

Sagarmatha IT Club (SITC) *August 2026*
Hackathon Participant – EchoPath (Assistive Obstacle Detection System)

- Built an assistive navigation prototype combining computer vision and hardware in a 12-hour hackathon build sprint.
- Implemented YOLOv8 Nano for real-time video obstacle detection and integrated HC-SR04 ultrasonic sensor for depth measurement.
- Engineered Python decision logic (Left/Center/Right, Near/Far) transmitting serial commands to an ESP32 for directional audio buzzer feedback.

Modern Montessory Bal Vidyalaya, Kanchanpur *2019 – 2020*
Student Body President

- Elected school president for Grade 10; coordinated school events and represented student interests to administration.
- Founded and structured student-led initiatives, fostering a collaborative school environment.

Projects

Cloud-Based Medication Adherence Monitoring Application *Flutter, Dart, Firebase, Node.js, Express.js, JWT Auth | 2024*

- Developed a cross-platform mobile app (Android/iOS) as a minor project with a team of four, featuring real-time Firestore data sync and role-based access for Supervisor, Doctor, Nurse, and Patient.
- Built a JWT-secured Node.js/Express REST API backend with node-cron scheduler for automated dose reminders and FCM.
- Integrated a chatbot powered by Groq API for clinical term explanations accessible to patients; produced full LaTeX documentation.

QR Code & PDF Desktop Toolkits *Python, CustomTkinter, Pillow, OpenCV, pypdf | 2026*

- Engineered privacy-focused desktop suites with modular UI components, custom styling studio, batch processing, and live camera QR scanning.
- Implemented multi-feature local PDF engine (merge, split, rotate, extract) with zero external network dependencies and instant preview.

Must Visit Nepal – Travel & Tourism Web Platform *HTML5, CSS3, JavaScript | 2024*

- Designed and developed a multi-page responsive web portal for Nepal trekking packages featuring interactive booking forms and navigation.
- Implemented client-side form validation and structured semantic HTML5/CSS3 layouts for an intuitive user experience.
